

MATERIALS YOU WILL TAKE HOME

"Construction Risk Analysis and Project Procurement Choices in the Caribbean" has been written by the faculty specifically for this programme. These notes provide a detailed summary of the topics covered at the programme and will be a valuable reference and resource in your work. Each attendee will receive one copy of the notes with registration, and this publication alone is worth the cost of tuition.

CARIBBEAN CONSTRUCTION ADVISORY SERVICES (CCAS)

is an alliance between Bould Consulting Group, headquartered in Grand Cayman, and Katz & Stone, L.L.P., a speciality construction law firm in the Washington D.C. area, that provides expert construction consulting services to clients throughout the Caribbean. **CCAS** offers construction industry professionals, owners, Governments, contractors, subcontractors, suppliers, designers and sureties the full range of legal, expert and consulting services vital to the successful resolution of project performance issues and construction disputes.

Given our familiarity with Caribbean construction conditions, the various forms of contract used in the region and both English and American construction contract law principles, we are able to provide our clients with experienced consultation not available from any other single source in the region. **CCAS** understands the realities of construction in the Caribbean and our work reflects what it takes to build a successful project.

CONSTRUCTION RISK ANALYSIS AND PROJECT PROCUREMENT CHOICES IN THE CARIBBEAN

Choosing the best method of procuring construction services appropriate for the project is the first step in ensuring on-time, on-budget completion. The procurement method selected will help define the appropriate group of potential bidders, as well as assist in the selection of the appropriate designer. The procurement method selected also is key to risk allocation. Hence, selection of a procurement method should drive the construction process and not merely be the last decision made before tender.
